			COMMENTS (Number each comment to show from whom to whom. Draw a line across column after each comment.)
			P&PD management has been notified. The only question raised is who is going to notify us when work starts outside and incapacitates the emergency exit so that we may properly secure/post notice on the inside of the door? I assume that this will be coordinated through the contractor and the NBPO to P&PD.....but I hesitate to rely upon assumptions. Will you coordinate this with the Chief, NBPO?

19 JUN 1984

MEMORANDUM FOR: Chief, New Building Planning Office,  
Office of Logistics

STAT

FROM: [redacted]

Chief, Safety Staff, DDA

SUBJECT: Maintenance of Emergency Egress -  
P&P Building Headquarters

1. The construction activity about to commence behind the P&P Building at Hqs. includes modifications to the 3 emergency exits on the West (rear) face of the buildings. The contractor cannot be permitted to close the two emergency exits from the lower level at the same time.

2. The contractor should be directed to complete the concrete walls and steps for one exit before taking the other exit out of service. The completed exit, in either case, will be some distance above grade until the backfill operations are complete. The first completed exit should be furnished with a set of temporary wooden stairs, maintained to existing grade to permit use as an emergency exit.
